

Appreciating Quality Automation

We at "DOLPHIN AUTOMATION" thank you for the purchase of this product and we assure you for our best services.....always!

PROGRAMMABLE PROCESS INDICATOR

MODEL NO.:-PI-64X / 34X

SPECIFICATIONS

DISPLAY	:	4 DIGIT , 7 SEGMENT LED .56"
SIGNAL INPUT	:	VOLTAGE 0-10VDC
	:	CURRENT 4-20mA
RESOLUTION	:	0.001 / 0.01 / 0.1 / 1 SELECTABLE
INDICATION ACCURACY	:	0.25% OF SPAN
POWER	:	AC 220 V+/- 10% @ 50Hz
	:	24 VAC /DC modes-on Request
OPERATING TEMP	:	0-50 deg C
HOUSING	:	ABS Plastic
DIMENSTIONS	:	48x96x58 / 72x72x86 mm

PROGRAMMING / OPERATING INSTRUCTIONS

- 1) Press KEY continuously for 10 seconds to open programming.
- 2) **MODE:** Parameter name **MODE** is displayed for 2 sec and then parameter value **UOLT** is displayed. Use & key to select **Curr** Mode . Press key for next parameter .
- 3) **ANALOG-Low :** Parameter name **L-SC** is displayed for 2 sec and then parameter value **00.00** is displayed . Use & key to change the value . Press key for next parameter.
- 4) **ANALOG-High :** Parameter name **H-SC** is displayed for 2 sec and then parameter value **10.00** is displayed. Use & key to change the value. Press key for next parameter.
- 5) **Display Resolution :** Parameter name **Dot** is displayed for 2 sec and then parameter value **0001.** is displayed. Press key to shift the position of decimal point. Press key for next parameter.
- 6) **Digital low:** Parameter name **D-L** is displayed for 2 sec and then parameter value **0000** is displayed. Decimal point will be displayed as per the "Display Resolution" selected above. Use & key to change the value. Press key for next parameter.
- 7) **Digital high:** Parameter name **D-H** is displayed for 2 sec and then parameter value **5000** is displayed . Decimal point will be displayed as per the "Display Resolution " selected above. Use & key to change the value. Press key for next parameter.
- 8) **Lock :** Parameter name **LOC** is displayed for 2 sec and then Parameter value **OFF** is displayed. Use & key to change the value to **On** . To save the changes and goto normal mode, press key for 3 seconds. To go back to MODE parameter, press key .

NOTE :

- a) If lock is ON, then no parameter can be changed . So first set LOCK to OFF.
- b) For changing the value off any parameter , press key to shift the cursor to next digit . Press key to increment the digit at cursor.
- c) If no key is pressed for 60 sec in programming mode then the meter will return to normal mode without saving any changes.
